Other Disabilities.</p> <p>Article 4</p> <p>The so-called “giftedness/talents” by the Act is referred to individuals</p>

with excellent potential or outstanding performance and, after evaluated by professionals, demonstrating needs for special education and related services, categorized as follows:

- A. Giftedness/Talents in Intelligence
- B. Giftedness/Talents in Scholarship
- C. Giftedness/Talents in Arts
- D. Giftedness/Talents in Creativity
- E. Giftedness/Talents in Leadership
- F. Giftedness/Talents in Other Areas

Article 5

For the development of special education, local authorities concerned should establish special education consultation committees, inviting scholars and experts, educational and school administrators, delegates of teacher organizations, parent representatives, professionals of special education, and delegates of related institutions and groups to participate in consultation, planning and development of special education services.

Among the members of the aforementioned committee, delegates of educational and school administrators combined are less than a half and those of a single gender less than a third of the total.

Measures and regulations of participation in consultation, planning, development of special education and other services are determined by local authorities.

Article 6

Local authorities should set up the Special Education Students Diagnosis and Placement Counseling Committee (briefly called DPCC), inviting scholars and experts, educational and school administrators, delegates of teacher organizations, parents, professionals of special education, and delegates of related institutions and groups to participate in diagnosis, placement, replacement, and counseling. Measures and regulations on implementation, procedures, duration, allocation of related resources, and operation are set by local authorities.

Among the members of the aforementioned committee, delegates of educational and school administrators combined are less than a half and those of a single gender less than a third of the total.

Measures of participation in consultation, planning, development of special education and other services are determined by local authorities.

Article 7

Local authorities should establish an independent department to monitor practices of special education services.

All the personnel and administrator responsible for special education services in special education schools and regular schools with special education classes should hire professionals with special education background.

The aforementioned special education background is referred to as taking up 3 or more credit hours of special education courses.

Article 8

Local authorities concerned should conduct regular research each year on the status of special education students, proclaim special education demographic needs, publish the yearly statistic report, appropriately allocate available resources based on current status and needs, and develop all the special education services.

Article 9

All the governments should availably develop the special education budget to the extent which is no less than 4.5% of the yearly educational budget in the central government and no less than 5% in the local government.

When the local government develops budgets, the special needs education comes as the top priority.

In order to keep a balanced development of local special needs education, the central government should reimburse budgets in personnel and practices. Measures of reimbursement are determined by the central government after communication with local governments.

Chapter II: Practice of Special Education

Part 1: General Rules

Article 10

Practices of special education fall into the following phases:

- A. Preschool: in the hospital, family, kindergarten, day school, social welfare facility, preschool of special education or other adequate places.
- B. Civil Education: in elementary school, junior high school, special education school or other adequate places.
- C. Senior High School: in senior high school, special education school or other adequate places.
- D. Higher/Adult Education: in college, university, and other adult education facility.

For the aforementioned phases A & B, placement of special education students follows the principle of proximity. But where there is a lack of adequate places in the school district of civil education, authorities concerned should find other appropriate places for placement of special education students.

Article 11

All the educational phases under senior high should establish special education classes, as follows:

- A. Centralized special education class.
- B. Decentralized resource room.
- C. Itinerant resource program.

Establishment of the aforementioned special education classes should be determined and certified by local authorities, whereas its personnel and facility are resolved by central authorities.

In the case students under senior high are not placed in the special education class based on the aforementioned regulations, schools involved have to apply for likely special education programs. Measures and regulations on application and procedure are determined by local authorities.

Article 12

The educational level, grade placement, class location and instruction practice of special education students should be flexible to the extent sensitive to their special educational needs. Their entry age of education and duration limit of schooling are required to shift to meet realistic needs.

Procedure and details of practices including lowering or raising the entry age, shortening or extending duration of schooling, etc., are all determined by central authorities. But in case there is a law involved, it should be followed.

Article 13

Special education is basically managed by local authorities, with incentives for private sectors. Measures and regulations involved with management of special education including target population, eligibility, handling of law offenses, and other details are set by local authorities.

Article 14

Schools under the senior high are required to set up an independent department monitoring the procedure in hiring all the personnel involving special education teacher, related professionals, and paraprofessionals.

Article 15

For the purpose of promoting quality of special education and related services, local authorities should offer training program and in-service re-education for special education teachers and related professionals..

Article 16

For the practice of special education, local authorities should proceed diagnosis of disabled and gifted students based on the diagnostic criteria.

The aforementioned diagnostic criteria, procedure, duration, educational needs assessment, reassessment procedure, and other details are determined by central authorities.

Article 17

Nurseries, kindergartens, and all the schools should identify positively or through application for special needs students, who, with their guardian' s or agent' s consent, should be appropriately diagnosed, placed, and provided with special education as well as related services.

Local authorities should reassess each year the adequacy of aforementioned placement.

In case where their guardian or agent fails to offer consent for diagnosis or placement, institutions (e.g., nurseries, kindergartens, and all the schools involved) should proclaim local authorities.

For the benefit of special needs students, institutions should request the guardian or agent to comply with post-diagnosis placement and related services.

Article 18

Provision and programming of special education and related services should be based on appropriateness, individualization, localization, accessibility, and inclusion.

Article 19

The curriculum, materials, methods and assessment in special education should be flexible to the extent that they meet the needs and suit the characteristics of individual students, with the measures set by central authorities.

Article 20

To develop potential of special education students to the maximum extent, all the schools should coordinate possible resources and recruit instructors with expertise in special education.

Article 21

Student' s guardian or agent is able to file a complaint to authorities concern for controversy over diagnosis, placement and counseling services. Authorities concerned should offer complaint services.

Student' s guardian or agent is able to file a complaint to the school for infringements of student' s rights in learning, counseling, support services and other learning activities. The school should offer complaint services.

Part 2: Education for Disabled

Article 22

All the schools and test centers must not reject student admission to school or test for the sake of disability itself.

All the schools and test centers must offer appropriate test services, and make a public announcement, with measures of test services for special needs students set by central authorities.

Article 23

To implement special needs education, local authorities should coordinate with medical resources and provide special needs students with rehabilitation and training therapy.

In order to carry out early intervention for special needs children, such special education services should start from age 3.

Article 24

Schools should provide special needs students with assessment, instruction and administrative support services, which should be based on collaboration of multidisciplinary teams and, where it needs, coordinate with professionals in medical hygiene, education, social work, independent living, and vocational restructure so as to jointly provide learning, living, psychological, rehabilitative, vocational assessment, and transition counseling services.

The implementation measures of the aforementioned support services and multidisciplinary teams are determined by central authorities.

Article 25

To provide special needs students of under senior high school with

appropriate education, local authorities and private sectors are encouraged to establish special education schools, which if likely are kept in a small scale. The top priority for admission goes to students with severe and/or multiple disabilities. Each and every city/county should establish at least one special education school (sub-school or class), each school with several campuses. Establishment of special education class should be based on the policy of prevalence and localization.

Special education schools for the hearing impaired are set for those with hearing impairments mainly, whereas special education schools for the visually impaired are majorly for those with visual impairments.

Special education schools are either national, city, county or private based on its main body (i.e., central government, city government, county government or private sectors), with its establishment, conversion or termination based on the following regulations:

- A. National: certified by the central authorities;
- B. City: certified by the city authorities and reported to central authorities for reference;
- C. County: certified by the county authorities and reported to central authorities for reference;
- D. Private: based on the Private School Act

Establishment of special education schools is required to meet criteria set by the central authorities, including land, building, equipment, faculty, alteration, termination/mergence, certification procedure, organization and personnel.

Article 26

Special education school is set for one principal, armed with expertise in special education, whose credential is based on the Educational Personnel Recruitment Decree, and the recruiting procedure following school regulations.

Article 27

Schools under senior high should offer special needs students in regular class with appropriate instruction and counseling services, with measures of instructional principle and counseling types set by local authorities. For the regular class teachers to take care both of special needs and other students, the aforementioned school should reduce the number of special needs student in the regular class, or providing the required manpower and assistance, with measures of the credential of class reduction, certified number, manpower and assistance set by the central authorities.

Article 28

Schools under senior high should develop the individualized education plan for each and every special needs student based on a multidisciplinary team, invite parents for participation and, where it needs, encourage professionals to accompany parents for participation.

Article 29

Schools under senior high should take into consideration of strengths, aptitude, special education needs, and career development of students with disabilities and therefore offer appropriate counseling services in admission to secondary education. The measures of counseling services in admission to secondary school after completion of compulsory education are set by the central authorities.

Article 30

Higher education for students with disabilities should meet their needs, offer in the form of special education, and assist their learning and development.

Governments should provide special needs students with adult education, encourage them to participate in life-long learning programs, with its measures concerning authorities in charge, operation, content, and other details set by the central authorities.

Article 31

For easy transition of service needs by students with disabilities, schools should offer complete and continuous transitory counseling services, with the measures set by the central authorities.

Article 32

Local authorities should waive educational fees of special needs students based on their familial economy status, offer educational subsidies for private kindergarten, day care center, or social welfare facility, and fund institutions that special needs toddlers attend.

The measures concerning subjects, qualification, amount, quota, frequency and other details of the aforementioned waiver and subsidy are set by local authorities. For those special needs students with excellent performance in academics and ethics, local authorities should offer premium, with the measures and regulations set by local authorities.

Article 33

School, kindergarten, day care center and social welfare facility should offer required educational assistive devices and support services based on learning and living needs of special education students, with the measures set by the central authorities.

Local authorities should offer free transportation for special needs student unable to go to/from school independently, or subsidy in case authorities had difficulty, with the measures and regulations set by the local authorities. Local authorities should set budget on top priority to carry out the aforementioned services.

Article 34

Local authorities must put in practice special needs education based on certified or delegated social welfare facility, medical center or juvenile correction school.

Part 3: Gifted Education

Article 35

Gifted education in preschool and schools under senior high is conducted as follows:

- A. Preschool education: in the type of special education project.
- B. Civil education: in the form of decentralized resource room, itinerant program, or special education project.
- C. Senior high education: on the basis of Article 11, Items A & C.

Article 36

Schools under senior high should take up the team teaching model, involving the aptitude, strengths, learning characteristics, and special needs of gifted students, developing individualized education plan of gifted students and, where it needs, inviting their parents for participation.

Article 37

Practices of gifted education in higher education should take into account of aptitude and strengths of gifted students, following the model of special education project.

Article 38

School admission and educational advance of gifted students should follow the procedure specified in the regulations of school admission and educational advance for regular students. Schools above senior high are able to carry on the multiple admission model, fully considering both school performance and potential strengths of gifted students.

Article 39

Gifted students are able to take up courses of higher grade, which if passed can be waived after successful school admission.

Article 40

Local educational authorities under senior high should fund schools in implementing the plural gifted education project, offering premium for excellent performance. Measures and regulations of funding and offering premium are set by local authorities.

Article 41

Local authorities and schools should reinforce diagnosis procedures and counseling services for gifted students with special needs and economical/social disadvantages.

Chapter III: Special Education Support Systems

Article 42

Local authorities should carry on research and publish the obtained data so as to achieve a better performance in development of special education curriculum, teaching materials and methods, and assessments.

Article 43

To encourage colleges and universities with special education department and institute affiliated with special education center to support diagnosis, instruction and counseling services, the central authorities should plan budget for subsidy. To conduct special

education research, colleges/universities are able to establish affiliated special education school/class.

Article 44

Local authorities should establish special education administrative support network in order to implement special education to the extent that it integrates possible resources, assists special education practices, and provides consultation, counseling and services. Measures and regulations on linking and operation of support network are set by local authorities.

Article 45

Schools under senior high should set up a special education implementation committee to run learning and counseling of special needs students on campus, with a parental representative of special needs student, of which the measures and regulations in terms of organization and operation are determined by local authorities.

Article 46

Schools should offer special needs family with consultation, counseling, parenting education, and transfer services. The budget and resources of the aforementioned support services are taken up by the local authorities.

At least one special needs parent should be member or standing member of the school parental committee, participating in operation of special education affairs.

Article 47

Local authorities should appraise once or more every three years the school under senior high on implementation outcome of special education. Central authorities should appraise once or more every three years the local authorities on implementation outcome of special education.

The appraised items and obtained data should be announced, with premium for excellent performance and follow up guidance for poor performance. The measures and regulations of appraisal are determined by local authorities.

Chapter IV: Affix Rules

Article 48

All the income and outgo involving lending space, facility and equipment, delegating operation, encouraging private sector in participation, student enrollment, school admission, screening, practicum, and extension education of public school education school should be documented in an independent account and specified in terms of automated clearing house. The rest balance has to be deposited for the purpose of improving school infrastructure and teaching equipment, unlimited by the Budget Act, Article 13, National Property Act Article 7, and Local Public Property Regulations

Article 49

The Enactment of regulations authorized by the Act should be participated by teacher organization and parent group.

Article 50

The specific enforcement rules of the Act are set by the central authorities.

Article 51

The Act is put into effect the day it is announced.
